

The Tracking Key is a small, pocket sized device that receives signals from the twenty-four Department of Defense satellites orbiting the earth. The internal computer accurately determines the location of the device within 2.5 meters and records this data every second.

With this data and the included LandAirSea Tracking software, you can accurately determine where a person traveled, how fast they drove, where they stopped and for how long. The recorded data from the Tracking Key can be displayed over a street map, satellite images or in a text report.

**“It’s like having your own Private Investigator for a fraction of the cost.”**

The Tracking Key is powered by just 2 AAA batteries and can be placed inside, outside and even underneath the vehicle. The strong magnet mounts allows for instant mounting. The Tracking Key is also water resistant.

Simply put, the Tracking key is an extremely affordable GPS vehicle tracking system that records driving information. Think of it as a video recorder developed specifically to monitor and document a vehicle’s traveled activities.

- **Logs data, including speed, every second**
- **Very affordable and NO ONGOING MONTHLY FEES!!!!**
- **Runs on just 2 AAA batteries**
- **16 channel GPS Receiver**
- **Accuracy of 2.5 meters**
- **Can be placed in, on, or under the vehicle in seconds.**
- **Create an easy to read text report**
- **Average battery life of 2 weeks with standard Alkaline batteries, 3 weeks with Lithium batteries. Battery life depends on hours driven per day. Above calculations are determined with 2 hours of driving per day.**
- **Fast USB download. The tracking key plugs right into your computer.**
- **Low battery indicator lets you know if you need new batteries.**
- **Data is compatible with the popular Google Earth.**
- **Shows every stop the driver makes.**
- **Shows you the maximum speed driven for the day.**
- **Displays location, date, and time of every stop.**

Physical Information	
Dimensions:	Length: 3.80 inches Width: 1.46 inches Height: 1.34 inches
Operating Temp:	-15°F to 185°F -26°C to 85°C
Housing:	Water Resistant
Mounting:	Magnetic

Power Information	
Power:	AAA Batteries
Battery Life	
1 Hour / Day Driving:	4 Weeks
2 Hours / Day Driving:	2 Weeks
4 Hours / Day Driving:	1 Week
Sleep Mode Entry:	2 Minutes of No Movement
GPS Acquisition	
Cold Start:	41 Seconds
Warm Start:	33 Seconds
Hot Start:	3 Seconds

Data Information	
Maximum Satellites:	16
Horizontal Accuracy:	2.5 meters
Communication:	NMEA
Data Output:	USB
Memory Type:	Flash Memory

Simply put, the LandAirSea Tracking Key is an extremely affordable, GPS vehicle tracking data logger system offering accurate tracking data contained within an easily deployable, miniature water resistant magnetically mounted housing.

Easy access and water resistant battery compartment with protective cap. Strong Magnet mounts allows for quick and easy installation.
